MESSAGE

I am very happy to note that the **7th International Conference on Microwaves, Antenna, Propagation and Remote Sensing (ICMARS-2011)** is being organized by ICRS, to be held in Jodhpur during 06th -10th December 2011. It is commendable that ICRS has been regularly organizing high quality conferences in Radio Science with participation from India and abroad. I hope that the topics covered in the conference will generate a lot of interest among the scientific community particularly, the special technical sessions on RISAT, OCEANSAT-2, SMOS and Planetary Exploration. The Exhibition being organized during the conference will benefit and enable the participants to interact with the representatives of Educational Institutions and Scientific Organizations from the field of Radio Science and with Companies and Industries exhibiting their latest products.

I congratulate Prof. Calla, for this initiative and wish that the conference will meet its objective and will be a grand success.

(Dr. Lalit Kumar)
